

Notice of Final Action

Notice is hereby given that the Air Pollution Control Officer (APCO) of the Bay Area Air Quality Management District has issued an Authority to Construct pursuant to Application Number 15487 for the **Russell City Energy Center**, located at Depot Road and Cabot Blvd, Hayward, California effective November 1, 2007.

The project is a 600 MW combined-cycle power plant consisting of two natural gas fired combustion turbine generators (CTGs), one steam turbine generator (STG) and associated equipment, two supplementally fired heat recovery steam generators (HRSGs), a 9-cell wet cooling tower, and a 300-hp diesel fire pump engine.

The equipment is subject to the Prevention of Significant Deterioration (PSD) analysis requirement.

The final engineering evaluation document for the APCO's decision to issue the Authority to Construct is available for public inspection at the Public Information and Education Office located on the 5th floor of District headquarters at 939 Ellis Street, San Francisco California, 94109.

The proposed project is projected to emit the following maximum quantities of regulated air pollutants:

Nitrogen Oxides	134.6 tons per year
Carbon Monoxide	389.3 tons per year
Particulate Matter (PM ₁₀)	86.8 tons per year
Sulfur Dioxide	12.2 tons per year
Precursor Organic Compounds	28.5 tons per year

Dated at San Francisco, the 30th day of November, 2007.
